

LYTTELTON PORT TE WHARE WHAKATIKA

RL System: RL FiberthermX
Project Size: 2,600m²
Location: Christchurch
Project Date: 2023

Architect: Kotahi Engineering
Contractor: Hawkins Construction
Installer: SWP Commercial

PROJECT DESCRIPTION

The new Lyttelton Port Workshop replaced the previous workshop which was built in the 1970's. Situated on the left-hand side of the building, there's a three-story office area equipped with general maintenance and storage facilities. In contrast, the structure on the right soars to full height, measuring over 20 meters in height. The location right at the waterfront on the edge of the harbour complicates matters, as it entails managing the distinctive challenges presented by the marine environment, known for its unique conditions and strong winds.

SPECIFIED ROOFLOGIC SYSTEM

RoofLogic's FiberthermX system:-

- FiberthermX roof
- FiberthermX walls
